PROFILE

Passionate Front End Developer proficient in HTML, CSS, JavaScript, React.js, with extensive experience in creating scalable web applications focused on user experience. Demonstrates strong problem-solving skills and excels as a collaborative team player. Dedicated to continuous learning and staying abreast of emerging front-end technologies. Eager to contribute technical expertise to dynamic projects.

PROJECTS

QuickInvoice: Revolutionizing PDF Invoice Generation >

ReactJS | JSpdf

- Developed a web-based invoice management system using ReactJS and jsPDF, enabling users to fill, generate, and download PDF invoices. Implemented features include dynamic form input, automatic calculations, and a responsive design for accessibility across devices. Collaborated in a team environment, ensuring a seamless user experience and enhancing productivity.

DevQuery: Navigating the Tech Terrain >

ReactJS

- Developed a Q&A website for developers that included development, UI/UX, testing, front-end, back-end, database management, IT support, DevOps, and HR sections. Each section contains 5 questions, including 2 technical, 2 situational, and 1 personal question. Through this project, I learned how to manage multiple files and data sets. It was developed using ReactJS.-

User Authentication Platform >

ReactJS | NodeJS | ExpressJS | MongoDB

- Developed a secure login system as part of a web application, utilizing Node.js, Express, and MongoDB to create a robust backend with full authentication capabilities. Designed to ensure each user ID is registered only once, with comprehensive security measures in place to protect user registration data. Integrated front-end technologies to provide a seamless and secure user experience.
- Student Data Management** : Crafted a student information system focused on storing and displaying student details on the frontend, ensuring efficient data handling and retrieval, and enhancing educational institutions' ability to manage student data effectively.
